# Enabling your frontline to empower your enterprise

**Frontline workers today represent nearly 80 percent of the global workforce.** But the technological divide between office and frontline workers also continues to grow. By putting better digital tools in the hands of those workers, enterprises can reap the benefits of visibility across their entire workforce while simultaneously enabling their frontline to work correctly and safely.

**84%** of (deskless) workers say they don't get enough direct communication from top management

**74%** of all employees feel like they are missing important company information

**51%** of (deskless) workers believe that language barriers prevent them from receiving practical training

**38%** of employees wish employers were clearer about safety plans

## Meet walt™

### The World's Most Advanced Smart Radio

**Smart Radios for Every Worker**
Rugged, purpose-built, ready for anything, and you don't pay for a device

- **Multi-Language Translation**
  Translate between languages instantly to break language barriers and keep your workforce collaborative and productive.
- **Mass Alerts**
  A safe, fast, and effective way to deliver critical messages directly to your field workers all at once.
- **Global Active Directory**
  Invite workers to connect, regardless of company, role, or location, and bring your frontline and contract laborers together instantly.
- **Dedicated 'Man Down' Button**
  Dedicated button to alert Safety or Emergency Services when help is needed, along with current location of the device.
- **Push-to-3 (PT3) Multimedia Communication**
  Push-to-Talk
  Push-to-Picture
  Push-to-Video
- **Complimentary Managed Services**
  Upgrades, repairs, and replacements are included.

## productivity

**30%** **improvement in productivity** reported after implementing a collaboration platform

- **Improved Communications**
  Multimedia collaboration is easy and accessible, enabling workers to improve problem-solving with language translation, images, video, and dictation.

## safety

**33%** **increase in safety** reported after implementing new tech to help employees work better

- **Increased Safety**
  Workers are informed with targeted alerts, muster is confirmed in real-time with geo-intelligence, and current safety measures are improved with dedicated workflows.

## efficiency

**70%** **more efficiency** from workers reported with better communication tech

- **Streamlined Operations**
  Workers communicate without barriers, and operations run smoothly while management can visualize inefficiencies and initiate organizational change.

## Superior Business Intelligence

weavix® acquires critical real-time data from your frontline workforce for actionable insight and superior business intelligence – enabling operational leaders to increase efficiencies and make a lasting impact on their enterprise.

- **Expand visibility** for safety and security
- **Accelerate communications** and workflows
- **Identify bottlenecks** across the facility
- **Take action** on unnecessary downtime

## Azure Services + Private MEC

Microsoft integrated solutions enable low latency, reliable coverage, and ubiquitous, high-performance connectivity for enterprises to effectively streamline productivity and collaboration on the frontline.

- Azure private MEC
- Azure Orbital Cloud Access
- Azure Cognitive Services
- Microsoft Dynamics 365
- Microsoft Teams
